EDUCATION

Rutgers, The State University of New Jersey | Expected May 2027

New-Brunswick, NJ

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures, Design and Analysis of Computer Algorithms, Computer Architecture, Software Methodology, Principles of Information and Data Management, Introduction to Artificial Intelligence, Discrete Structures I, Discrete Structures II, Introduction to Deep Learning, Introduction to Data Science.

TECHNICAL SKILLS AND SOFTWARE PROFICIENCIES

Languages: Java, C#, Python, SQL, HTML, CSS

Frameworks: ASP.NET Core, Entity Framework Core, Pandas, NumPy

Tools: Git, GitHub, IntelliJ IDEA, Eclipse, Visual Studio Code

Testing and debugging: Unit Testing • Debugging • Troubleshooting • Performance Profiling

Core Competencies: Backend Development • RESTful APIs • ASP.NET Core • Java Development • SQL • Object-Oriented Design • Entity Framework Core • JavaFX • Software Testing • Git

PROJECT EXPERIENCE

CareerPilot AI-Powered Job Application Platform: Java | Spring Boot | React | TypeScript | PostgreSQL | Rest API
OpenAI API | Docker

- Engineered and deployed a **full-stack job application platform** with React, TypeScript, Spring Boot, and PostgreSQL, featuring CRUD workflows, search/filtering, pipeline tracking, status history, and job-search analytics.
- Designed **REST APIs with Spring Data JPA/Hibernate** and implemented JWT authentication, BCrypt password hashing, and user-scoped authorization with Spring Security; integrated the **OpenAI Responses API** for job-description analysis, résumé keywords, interview topics, and preparation recommendations.
- Built **automated frontend/backend tests** for core workflows and authorization, containerized the application with Docker, and deployed the full-stack system using environment-based production configuration.

RU Cafe Ordering System: Java | JavaFX | SQLite | JDBC | Maven | JUnit

- Developed a Java-based café ordering system using OOP principles including inheritance, polymorphism, and encapsulation to manage menu items and customer orders.
- Implemented order creation, modification, pricing calculations, and customizable menu-item functionality across multiple product categories.
- Applied Java collections and modular class design to efficiently manage order data and improve code maintainability.

Student Management System: C# | .NET | OOP

- Developed a Java-based student management system using OOP principles to organize and manage student records.
- Implemented functionality to add, update, search, and remove student information with input validation and error handling.
- Applied Java collections and modular class design to efficiently store and retrieve student data while improving code maintainability.

WORK EXPERIENCE

Student Software Developer | Rutgers IPO. **Jul 2025-Present** **Piscataway, NJ**

- Developed and maintained multiple Rutgers applications, including the **Fire Inspection system**, using **C#, .NET, ASP.NET MVC, Razor, JavaScript, SQL Server, and Oracle**, contributing across UI, backend logic, and database workflows.
- Improved **email notification reliability by 50%** by engineering configurable recipient batching for a **C#/.NET Worker Service**, strengthening logging and exception handling, and validating SMTP processing with **200+ recipients**.
- Reduced **UI complexity by 20%** by modernizing ASP.NET MVC forms, navigation, validation, and responsive layouts while preserving existing business logic and production functionality.
- Supported application modernization and deployment across **local, test, and production environments**, troubleshooting database/configuration issues and contributing to **LDAP → CAS/Duo authentication migration** using Padman, Git, Bitbucket, and Visual Studio.

IT Service Desk Intern | Rutgers IPO **Jan 2025 – Jul 2025.** **Piscataway, NJ**

- Reduced average issue resolution time by **20% by diagnosing hardware, software, network, authentication**, and Windows workstation issues and identifying root causes for recurring technical problems.
- Maintained a **95% successful support resolution rate** by troubleshooting account access, connectivity, university applications, peripherals, and system configuration issues while escalating complex incidents when necessary.
- Accelerated **workstation deployment by 30% by configuring Windows devices**, installing software, and applying system updates.

LEADERSHIP AND AWARDS

Scholarship Recipient • [IIE \(International Institute of Education\)](#) • Member of strategy team • [Rutgers Solar Car Team](#) • Women in Science and Technology • [Douglas Residential College](#) • Orientation Leader • Rutgers Global.
